# 1. Qualitative information on the quarterly financial results

## (1) Explanation regarding the operating results

Japan's economy during the consolidated cumulative period of the second quarter continued to recover moderately, while affected by high resource prices as the effects of supply constraints on semiconductors and other products eased and the balance between suppressing the COVID-19 Pandemic and economic activities progressed.

In the domestic automobile market, the total number of new vehicle sales increased to 106.6% (statistical data of the Japan Automobile Manufacturers Association) as compared to the consolidated cumulative period of the same quarter from the previous year (hereinafter referred to as the same quarter from the previous year), but it's still low at 88.5% compared to the year before last, due to low domestic production. The number of registered used vehicles decreased to 95.1% compared to the same quarter from the previous year, due to the reluctance to buy as the used vehicle market rises.

Revenues increased in all segments, mainly due to the strong performance of the used vehicle export business to Malaysia and an increase in the number of units for vehicle transportation contracts. Operating profit increased due to higher utilization rates resulting from increased sales in all segments, despite the impact of higher unit prices for fuel.

As a result, the business results of our group are as follows: sales revenue of 64,247 million yen (138.4% compared to the same quarter from the previous year) and operating profit of 2,174 million yen (161.8% compared to the same quarter from the previous year). Also, the profit before taxes was 2,172 million yen (159.4% compared to the same quarter from the previous year), and the profit of the quarter attributable to the equity shareholders of the company was 1,457 million yen (177.3% compared to the same quarter from the previous year).

Number of units related to domestic distribution of automobiles

Units: vehicles

Domestic	July of 2021 to December of 2021	July of 2022 to December of 2022	Compared to the previous year
Number of new vehicles sold			
Domestic manufacturer *1	1,860,493	1,989,325	106.9%
(out of this, Nissan Motor) *1	(199,698)	(220,844)	(110.6%)
Foreign manufacturer *2	123,261	125,818	102.1%
Total of new vehicle sales	1,983,754	2,115,143	106.6%
Number of registered used vehicles			
Registered vehicles *3	1,769,021	1,672,409	94.5%
Light vehicles *4	1,358,364	1,301,515	95.8%
Total number of used vehicles registered	3,127,385	2,973,924	95.1%
Export	July of 2021 to December of 2021	July of 2022 to December of 2022	Compared to the previous year
New vehicles of domestic manufacturers *1	1,797,260	2,080,620	115.8%
Used vehicles (registered vehicles) *5	654,635	631,523	96.5%

\*1 Calculated from Japan Automobile Industry Association Statistics \*2 Calculated from Japan Automobile Importers' Association statistics \*3 Calculated from Japan Automobile Dealers Association statistics

\*4 Calculated from Japan Mini Vehicles Association statistics\*5 Trial calculated from the number of export deleted registered vehicles in the Japan Automobile Dealers Association statistics

Fuel retail price

Unit: Yen / L

National average	July of 2021 to December of 2021	July of 2022 to December of 2022	Compared to the previous year
Light oil *6	142.1	149.4	105.1%
Regular petrol *6	162.2	169.3	104.4%

\*6 Calculated from statistics of Agency for Natural Resources and Energy (fuel used by our company for transport is mainly light oil)

The segment business results are as follows.

#### (1) Domestic automotive related businesses

For vehicle transportation, which is the core business, the number of units for transportation contracts for new and used vehicles increased, which led to an increase in revenue. In addition, there was an increase in revenue of Zero Plus IKEDA Co., Ltd., which became a consolidated subsidiary, and as a result, there was an overall increase in revenue in the domestic automotive related business.

Segment profit was affected by increases in unit fuel prices and fuel surcharges for marine transportation due to soaring crude oil prices and the rapid depreciation of the yen in terms of cost, but in terms of revenue, the introduction of the fuel surcharge system in September 2022 and the effect of higher utilization rates due to increased revenues outweighed the impact of higher fuel costs, resulting in an increase in segment profit.

As a result, the overall sales in the domestic automotive related businesses was 27,767 million yen (112.7% compared to the same quarter from the previous year), and the segment profit was 2,217 million yen (130.8% compared to the same quarter from the previous year).

In the vehicle transportation business, the Group continued to implement the "Digitalization", "Greening", and "New normal" policies outlined in our mid-term management plan through June 30, 2024.

In the area of "Digitalization", we have set up the Transportation Digitalization Promotion Office and are promoting the construction of a system to realize systematic allocation of vehicles. We have also launched and are promoting a new digitalization project in which crew members record the condition of vehicles entrusted by customers using tablets.

In the area of "Greening", we have completed the development of transportation equipment with an increased maximum loading capacity to cope with the increased weight of automobiles as they become more electrically powered, and we will sequentially introduce the equipment. In addition, with the rapid adoption of EVs, a new Sales Planning Department have been established to study the establishment of an infrastructure that includes the implementation of ancillary services in EV vehicle transportation.

In response to the "New Normal", the direction of the Ministry of Health, Labour and Welfare's revision of the Improvement Standards Notice has been set, we will reduce indirect time other than operation hours by promoting a system of division of labor in cargo handling while maintaining the operation hours of crew members toward the "Year 2024 Problems", and at the same time, we will promote new hiring of crew members and efficient operation of transportation equipment.

#### (2) Human resource businesses

In the pickup service business, revenue increased due to the acquisition of new contracts and an increase in MaaS (Mobility as a Service) services for J:COM (JCOM Co., Ltd.). In the human resources business, revenue increased due to an increase in the number of dispatched drivers and temp workers mainly in eastern Japan, and in the airport-related business, revenue increased due to an increase in the number of dispatched personnel along with the recovery in the number of flights to and from Japan. Segment profit increased due to increased revenue in each business segment and cost reduction.

As a result, the sales revenue of the overall human resource business was 10,291 million yen (107.0% compared to the same quarter from the previous year), and the segment profit was 366 million yen (156.2% compared to the same quarter from the previous year).

#### (3) General cargo business

Revenue in the port cargo handling business increased due to increased fuel cargo handling for biomass power plants, and the revenue in the transport / warehousing business decreased due to letting go of unprofitable customers despite starting up a third-party logistics business by leasing new warehouses. For segment profit, the transport / warehousing business reported a decrease due to start-up expenses for the newly leased warehouses, but the port cargo handling business reported an increase due to increased fuel cargo handling for biomass power generation, increasing the revenue in the overall general cargo business

as well.

As a result, the sales revenue of the overall general cargo business was 3,297 million yen (105.0% compared to the same quarter from the previous year), and the segment profit was 567 million yen (113.6% compared to the same quarter from the previous year).

#### (4) Overseas Related Businesses

In the used vehicle export business, sales increased significantly due to an increase in the number of vehicles exported to Malaysia, a major export destination, as a result of an increase in local demand, partly due to the depreciation of the yen, while previous activities to improve customer satisfaction led to an increase in market share. In the CKD business, revenue decreased due to a decrease in packaging volume during the model changeover. In the vehicle transportation business in China, sales increased due to the recovery of the Chinese automobile market.

Segment profit increased in the used vehicle export business and the vehicle transportation business in China due to increased sales, and decreased in the CKD business due to decreased sales.

As a result of the above, the sales revenue of the overall overseas business was 22,891 million yen (253.8% compared to the same quarter from the previous year), and segment profit was 213 million yen (525.0% compared to the same quarter from the previous year).

Furthermore, the company expenses not included in the abovementioned report segment (expenses affiliated with our company's management division), etc. are allocated as an item in the "adjustment amount" as indicated in "2. (Segment information) in the summary of the quarterly consolidated financial statements and major notes", and totalled 1,190million yen.

## (2) Explanation regarding financial position and cash flow

### (1) Status of assets, liabilities, and equity

#### (Assets)

Current assets increased by 1,147 million yen (4.7%) compared to the end of the previous consolidated fiscal year to 25,752 million yen.

This was mainly due to an increase of 1,146 million yen in inventories.

Non-current assets decreased by 511 million yen (1.7%) compared to the end of the previous consolidated fiscal year to 29,778 million yen.

This was mainly due to a decrease of tangible fixed assets of 535 million yen resulting from amortization of assets of right to use, etc.

As a result, total assets increased by 635 million yen (1.2%) compared to the previous consolidated fiscal year to 55,531 million yen.

#### (Liabilities)

Current liabilities decreased by 67 million yen (0.4%) compared to the end of the previous consolidated fiscal year to 18,564 million yen.

This was mainly due to a decrease of 851 million yen in trade and other payables, despite an increase of 351 million yen in borrowings and 418 million yen in other current liabilities.

Non-current liabilities decreased by 343 million yen (6.1%) compared to the end of the previous consolidated fiscal year to 5,306 million yen.

This was mainly due to a decrease of 453 million yen in lease liabilities.

As a result, total liabilities decreased by 410 million yen (1.7%) compared to the end of the previous consolidated fiscal year to 23,870 million yen.

#### (Equity)

Total equity increased by 1,046 million yen (3.4%) compared to the end of the previous consolidated fiscal year to 31,661 million yen.

This was mainly because retained earnings increased by 1,020 million yen.

(2) Cash flow status

Cash and cash equivalents (hereinafter referred to as "funds") at the end of the consolidated accounting period of the second quarter increased by 43 million yen compared to the end of the previous consolidated fiscal year to 5,224 million yen.

Each cash flow status category during the consolidated cumulative period of the second quarter and their causes are as follows.

(Cash flow from operating activities)

Funds obtained as a result of operating activities were 2,842 million yen (there was an income of 3,073 million yen during the same period of the previous year).

The main cause of the increase in funds were 2,418 million yen for depreciation and amortization expenses which are non-fund expenses and 1,465 million yen in quarterly income; the main cause of the decrease in funds was 1,146 million yen increase in inventories.

(Cash flow from investment activities)

Net cash used in investment activities was 1,051 million yen (expenditures of 588 million yen during the same period of the previous year).

The main itemization breakdown for expenditures was 990 million yen for acquisition of tangible fixed assets and investment property.

(Cash flow from financing activities)

Funds used as a result of financing activities was 1,673 million yen (expenditures of 1,493 million yen during the same period of the previous year).

The main itemization breakdown for expenditures were 1,503 million yen lease liabilities payments and 376 million yen for dividends, while the main itemization breakdown for income was 221 million yen net increase for short-term borrowings.

(3) Explanation on future forecast information, such as consolidated earnings

We have revised our consolidated earnings forecast for the fiscal year ending June 2023 based on the performance trends and other factors during the second quarter of the current fiscal year.

Please refer to the "Notice of Revision of Earnings Forecast and Year-End Dividend Forecast" announced on February 9, 2023

for details regarding the revision of the consolidated earnings forecast.

## 2. Summary of the consolidated financial statements and major notes

### (1) Summary of quarterly consolidated statement of financial position

(Units: Million yen)

	End of the previous consolidated accounting year (June 30, 2022)	End of the consolidated accounting period of this second quarter (December 31, 2022)
Assets

(Business Combination)

Consolidated cumulative period for the previous second quarter (from July 1, 2021 to December 31, 2021)

On July 1, 2021, our group acquired a partial equity interest (40%) in Zero Scm Logistics (Beijing) Co., Ltd., a jointly controlled company accounted for by the equity method, and made it a subsidiary.

(1) Outline of the Business Combination

(1) Name and business of the acquired company

Name of the acquired company: Zero Scm Logistics (Beijing) Co., Ltd.

Business description: Vehicle transportation business in China

(2) Acquisition date:

July 1, 2021

(3) Percentage of voting equity interest acquired:

Percentage of voting rights held immediately prior to the acquisition date: 25%

Percentage of voting rights additionally acquired on the acquisition date: 40%.

Percentage of voting rights after acquisition: 65%

(4) Reasons for the business combination

Since its establishment on April 29, 2004, Zero Scm Logistics has been mainly engaged in the land transportation of finished vehicles in China for Japanese, European and American automobile manufacturers, including marine and rail transportation. In addition, related operations include customs clearance, storage, and PDI (Pre-Delivery Inspection).

In China, which has become the world's largest automobile market, changes such as the evolution of CASE, MaaS, and carbon neutrality are on the horizon, and in order to follow these changes in a timely manner, our group aims to speed up the decision-making process by making the company a consolidated subsidiary, and further expand its business. Specifically, as the used vehicle market is expected to be developed in China, we will consider full-scale entry into the used vehicle transportation market. Also, assuming that electric vehicles produced in China will be imported to Japan in the future, the Zero Group will consider establishing an integrated domestic and overseas transportation system (complete vehicle transportation in China → export customs clearance → marine transportation → import customs clearance → complete vehicle transportation, PDI, installation, registration, delivery, etc. in Japan).

(5) Method of acquiring control of the acquired company:

Acquisition of equity interest in exchange for cash

(2) Fair value of acquisition consideration, assets acquired and liabilities assumed as of the acquisition date

(Units: Million yen)

Fair value of acquisition consideration	
Fair value on the acquisition date of the shares of the acquired company held immediately prior to the acquisition date	326
